EXPERIENCE

AQUILA SOFTWARE CORPORATION

Backend Software Engineer Intern

Davao City, Davao Del Sur

February 2026 – May 2026

- Developed and maintained backend web application modules using C# (ASP.NET Web API) and PostgreSQL, following clean architecture principles to ensure scalable and reliable backend services.
- Diagnosed and resolved critical backend bugs, improving system stability and reducing recurring issues reported during QA and production cycles.
- Collaborated with senior developers in an agile environment, participating in sprint planning, code reviews, and feature delivery across .NET backend services.

PROJECTS

AQUILA SOFTWARE CORPORATION - ACCOUNTING SYSTEM (CLIENT PROJECT)

Backend Software Engineer

February 2026 – May 2026

- Built a backend accounting system using C# (ASP.NET Web API) and PostgreSQL, implementing financial modules including general ledger, inventory management, payroll and trial balance with accurate debit/credit reporting.
- Followed clean architecture patterns with CQRS, validation layers, and paginated data queries, maintaining high code quality and consistency across multiple feature branches.
- Delivered enhancements and bug fixes across multiple sprint cycles, resolving data integrity issues and aligning system behavior with real-world business and accounting requirements.

EFRES SEEDLINGS - AGRICULTURAL PLATFORM (CAPSTONE PROJECT)

Full - Stack Web Developer

August 2025 – February 2026

- Built a full-stack agricultural management platform for a real-world client using Laravel, MySQL, and Tailwind CSS, supporting multi-workflow crop tracking, seedling inventory, and sales monitoring.
- Designed Figma-informed UI components and data-driven dashboards that reduced manual data entry and improved operational efficiency for end users.
- Integrated a machine learning component for predictive crop yield insights, backed by a normalized MySQL database of 10+ relational tables ensuring platform-wide data integrity.

TRANSPORT HUB - TRANSPORTATION MANAGEMENT SYSTEM

Full - Stack Web Developer

January 2025 – March 2025

- Built a full-stack transportation management system using C# (ASP.NET MVC) and MS SQL Server, managing routes, driver schedules, and real-time trip status with a Tailwind CSS frontend.
- Implemented structured MVC architecture with controllers, models, and views to handle route assignments, scheduling logic, and live status updates.
- Managed end-to-end frontend-backend integration and resolved cross-stack issues across the full development cycle.
