Experience

AQUILA SOFTWARE CORPORATION

Software Engineer Intern

Davao City, Davao Del Sur
March 2026 – June 2026

- Developed and maintained scalable web applications handling both frontend and backend services, ensuring optimal performance and functionality across all pages.
- Identified, troubleshooted, and resolved frontend and backend bugs, improving overall website stability and user experience.
- Collaborated with cross-functional teams to implement new features and enhancements using modern web technologies, contributing to sprint planning and code reviews.

Projects

AQUILA SOFTWARE - ACCOUNTING SYSTEM (Client)

Software Engineer

March 2026 – June 2026

- Built and maintained a comprehensive web-based accounting system, handling both frontend and backend development to ensure reliable financial workflows.
- Wrote clean, maintainable code following best practices for performance, UX optimization, and long-term maintainability of web services.
- Delivered website enhancements and bug fixes aligned with real business requirements and accounting workflows.

EFRES SEEDLINGS - AGRICULTURAL PLATFORM (Capstone)

Full - Stack Web Developer

August 2025 – February 2026

- Built and deployed a full-stack agricultural management platform with a responsive frontend using Tailwind CSS, optimizing layout, UX, and page performance.
- Designed and managed landing pages and data-driven UI components to streamline plant growth tracking and agricultural reporting.
- Integrated a machine learning component and managed a robust MySQL database to support data-driven decision-making across the platform.

TRANSPORT HUB - TRANSPORTATION MANAGEMENT SYSTEM

Frontend/Web Developer

January 2025 – March 2025

- Developed a responsive web interface for a transportation management system, ensuring optimal UX and smooth cross-browser functionality.
- Implemented and maintained key web features including real-time route displays and scheduling components using HTML, CSS, and JavaScript.
- Troubleshooted and resolved technical issues across the frontend and backend to maintain website reliability and performance.
